GREEN MARKETS RESEARCH DELIVERS:

Global Supply & Demand Models

Your detailed monitor of the macro forces shaping global fertilizer prices across the spectrum of nutrients. These live models deliver informed analysis, estimates, and forecasts of the global fertilizer market balance that you won't find anywhere else.

Delivered to you in a multi-layered spreadsheet format, these models offer full transparency into exclusive capacity, inventory, consumption and import/export estimates at the facility, country and regional level. Perfect both as a standalone resource for strategic planning, and as a complement to your own internal market intelligence efforts.

Models are available for each of the global Nitrogen, DAP/MAP, and Potash markets.

Global Cost Curve & Analysis

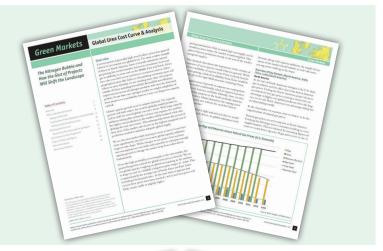

Understand the relative significance of regional production costs and capacity and their respective impacts on global prices. This research delivers insight into the price floors of nutrients in all the major producing regions. With current and forecasted production levels in hand, you'll gain a keen sense for where pricing is headed in the short, mid and long-term.

Global cost curve analysis is available for each of the global Urea, DAP/MAP, and Potash markets.

Global Fertilizer Market Reports

Stay aware of the impact of major fertilizer market developments, as they happen. Leveraging the thought leadership of the Green Markets analyst team and its associated network of industry experts, you'll gain an inside perceptive on the influences of regional conflict, plant outages, governmental actions, and more.

What will you uncover in the next Global Fertilizer Market Reports? Time, significant market events and your call to Green Markets will tell!
